700	<i>Aspidium acrostichoides</i> , List.
200	" <i>thelypteris</i> "
200	<i>Dicksonia punctulata</i> "

200 *Pteris aquilina*, Ea. & 10 List, 100 for \$4.50

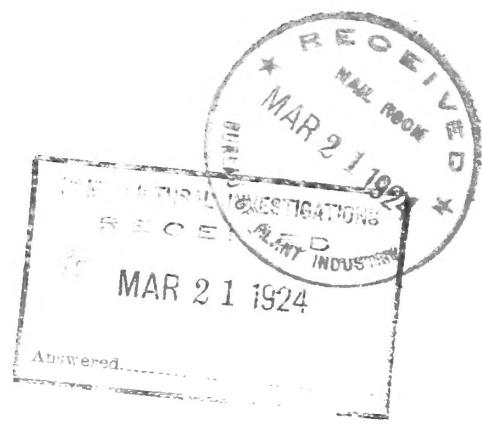

Besides this list of stored stock, we have many others in small amounts and many items on inclosed list that we have winter planned out, located beds where it may be had, or can secure from the old stems of the plants.

The special prices offered on many of the items is to close them out and not need to plant them. Order at once. This stock will not last long when this list reaches our customers.

While very many of the items on our regular list, which is included with this, may be had at this season, on early orders, either locally or thru our chain of collectors, there are many of them that may not be had till after blooming for this season. In placing orders, please advise whether the order shall be cancelled if we are unable to supply the item in time for this season's bloom.

Of course it must be remembered that the low price of slightly out-of-season plants is conditioned on our getting them at the most "convenient" time, which usually is also the safest time to handle them. Such items may be handled safely through the greater part of the winter open season, these may be collected only during March, April, May. Please get your orders in as early that we may get the stock out at the best, safest time.
